IN IT FOR THE LONG HAUL

BY DANIEL BROWNE

In 2003, The Wallace Foundation began helping cities coordinate efforts and resources to bring young people afterschool opportunities that otherwise might be out of reach. At the time, a few cities were pioneering this approach, but it was still a novelty. The afterschool system-building field has grown and learned much since then. At least 77 of the 275 largest U.S. cities have put in place one or more key strategies to coordinate their afterschool programs. In 2014, Providence's system celebrated its 10th anniversary.

Cities with more advanced systems, like Providence, are now developing strategies to ensure their work thrives over the long haul. But even for those just starting out, it's not too early to begin thinking about sustainability. A new Wallace report, *Growing Together, Learning Together: What Cities Have Discovered About Building Afterschool Systems*, highlights some key considerations that go into sustainability planning.

HOW CITIES ARE SUSTAINING THEIR AFTERSCHOOL SYSTEMS

THE MAYOR IS NOT ENOUGH

There is no substitute for the leadership of a committed mayor or county executive, especially in the early stages of getting a system off the ground. At the same time, system builders have learned an important lesson: All leaders eventually step down. Whether due to term limits or other factors, mayors come and go, as do important civic figures beyond city hall. For school superintendents, the time in office can be particularly brief: In its

first decade, the Providence After School Alliance has worked with no fewer than five superintendents.

Thus, the committed leadership of a top-level executive such as a mayor or superintendent is necessary for successful system building, but it is not enough. For a system to survive, all the major players—from city agencies, private funders, and schools, to program providers and the families they serve—need to “own” the effort.

EARNING A SEAT AT THE “COLLECTIVE IMPACT” TABLE

Moreover, a number of cities are now launching “collective impact” initiatives, rallying an array of civic institutions around a common goal. It is important that afterschool system builders earn a seat at the table. Not only could they make a vital contribution to any initiative that involves the education and well-being of young people, they could also participate in a citywide, multisector

partnership to help embed an afterschool system in the public consciousness and policy agenda.

Such is the case in St. Paul, Minnesota, where Sprockets, the afterschool coordinating entity, works with Generation Next, a public-private partnership that seeks to close the achievement gap between white students and students of color from kindergarten through college. Similarly, the Louisville, Kentucky, afterschool system is a partner in 55,000 Degrees, a collective impact initiative positioned primarily as an economic development project, with a goal of adding 55,000 post-secondary degrees to the city by 2020.

MOVING TO A NEW HOME

In some cases, a civic leadership transition may lead an afterschool system to seek a new

institutional home. The Nashville After Zone Alliance (NAZA) started life in 2009 in the office of Mayor Karl Dean, the city's chief champion of afterschool system building. Within a few years, NAZA was facing a dilemma: Because of term limits, Dean would leave office at the end of 2015, and there was no way of knowing whether the next mayor would consider afterschool a priority. The solution: Move the operation out of the mayor's office and into the Nashville Public Library, a stable home with its own public and private funding sources.

The Fort Worth, Texas, afterschool initiative, SPARC (Strengthen after-school Programs through Advocacy, Resources and Collaboration), originally resided in Fort Worth's Parks and Community Services Department. After deliberations led by Mayor

Betsy Price, SPARC formed its own nonprofit organization so it would endure after Price's administration ended.

AND SO MUCH MORE

Preparing for a supportive mayor's departure is just one aspect of sustainability planning. Securing reliable funding streams; grooming the next generation of initiative coordinators, intermediary CEOs, and the like as the first generation moves on; making the system story as compelling as possible so systems don't get lost in a crowded policy landscape: These are all challenges maturing systems are facing.

The years ahead will no doubt bring many more insights, as cities across the country continue to grow and learn together. [NAA](#)

EZChildTrack

Web-based Childcare Management Software

From the Nation's Leading After School Software Provider

- ✓ Automated Billing
- ✓ Parent Portal with Online Registration
- ✓ Automated Payments (Credit Card & Bank Account)
- ✓ Attendance Tracking by iPad/Tablet, Badge Scan
- ✓ Email and Text Message Blast
- ✓ Summer Camp Management

Have a grant funded program?

EZReports is being used by over 2,500 schools nationwide to manage their grant-funded afterschool programs. **EZChildTrack** works with **EZReports** to provide a complete solution.

PROCARE: How do you manage?

Procure Software powers 27,000+ child care centers and school districts. Its flexible, modular format simplifies management of child and family information in such business settings as afterschool programs, early learning centers, and preschools. Additional services include tuition collection, data hosting, online payments, and online wait lists.

Spend less time at the desk. Spend more time with the children. Procure’s powerful, time-saving features could help you: **Process hundreds of recurring fees in seconds.** • **Automatically calculate extra hours and late pickups.** • **Batch check-in bus runs or specific programs.** • **Message parents.** • **Send statements and year-end summaries.** • **Track time and attendance.** • **Track enrollment trends.**

Procure has helped hundreds of thousands of early childhood professionals streamline child care management, administration, record keeping, and automated payment processing at daycare centers and similar facilities worldwide. Learn how you could benefit from Procure. Visit procaresoftware.com or call 800.338.3884.

CHARITY FOR CHANGE: Take a minute to inspire

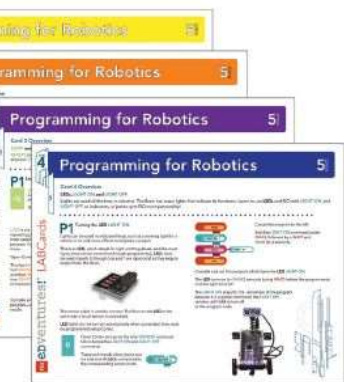

EMPATHY. COMPASSION. SELF-EFFICACY.

All children, regardless of socioeconomic background, deserve to know the feeling of giving and helping others. Take a minute to remember how you felt the last time you gave time or money to help someone in need. The Charity for Change Giver Program integrates service learning and character education into a standards-based math and character education curriculum.

Students are powerfully captivated by the interactive online mascots, while earning money from Charity for Change that is given to charities the students research and select. Charities demonstrate the impact the students are making by speaking at the afterschool site.

“The students’ enthusiasm for giving and learning through the Giver Program is palpable,” said Florida State Representative Kathleen Passidomo. “This Program should be available to every afterschool program in the country!”

PCS EDVENTURES: LABCards Curricula Series

Looking to bring more variety to your afterschool program? PCS Edventures recently created a series of curricula perfect for afterschool settings, clubs, and more. Known as LABCards, these newly developed units cover topics ranging from exciting robotics and programming to 3-D printing, computer coding, and more. LABCards were designed with the needs of afterschool instructors in mind, by being extremely granular and easy-to-understand, as well as student-driven.

Each unit of LABCards comes with four distinct levels differentiated by color, and each level contains five cards full of projects, challenges, and design activities. This unique way of creating projects for kids in grades 4 through 8 has made it easy for instructors to encourage learner independence and foster confidence in their students. LABCards also naturally progress from level to level, which reinforces concepts and skills from early projects throughout later challenges and activities. To learn more about these exciting new afterschool products, head to edventures.com!

how do you manage ?

Do it with Procare, the most widely used after-school management system—used in 27,000+ centers and school districts across the country.

- Process hundreds of recurring fees in seconds
- Automatically calculate extra hours & late pickups
- Collect payments from bank, debit & credit cards
- Send parent communications, email statements
- Track and calculate child/staff time & attendance
- Batch check in bus runs or specific programs
- Manage a wait list, track enrollment trends
- Operate on a local computer or host in the cloud

GIVER PROGRAM™

An integrated curriculum combining
**SERVICE LEARNING, STEM and
CHARACTER EDUCATION**

- EASY to implement online activities
- VOLUNTEER projects and charity visits to your site
- KIT with certificates and weekly prizes
- CURRENT PreK-5 State Standards
- SUPPORTS 21st CCLC with reportable data
- AFFORDABLE with proven results
