Annex of Literature on Youth Arts Engagement and Well-Being

About RAND

RAND is a research organization that develops solutions to public policy challenges to help make communities throughout the world safer and more secure, healthier and more prosperous. RAND is nonprofit, nonpartisan, and committed to the public interest. To learn more about RAND, visit www.rand.org.

Research Integrity

Our mission to help improve policy and decisionmaking through research and analysis is enabled through our core values of quality and objectivity and our unwavering commitment to the highest level of integrity and ethical behavior. To help ensure our research and analysis are rigorous, objective, and nonpartisan, we subject our research publications to a robust and exacting quality-assurance process; avoid both the appearance and reality of financial and other conflicts of interest through staff training, project screening, and a policy of mandatory disclosure; and pursue transparency in our research engagements through our commitment to the open publication of our research findings and recommendations, disclosure of the source of funding of published research, and policies to ensure intellectual independence. For more information, visit www.rand.org/about/research-integrity.

RAND's publications do not necessarily reflect the opinions of its research clients and sponsors.

About This Annex

A large and growing body of research on youth, well-being, and the arts exists, but it is fragmented across multiple disciplines (e.g., psychology, education) and areas (e.g., different art forms, different definitions of *youth well-being* and *arts engagement*). This annex provides details on a literature review we conducted to summarize global themes and gaps in the current multidisciplinary literature on the relationship between arts and youth well-being. We used an equity-centered environmental scan to extract nuanced insights from the vast repository of information. Findings on the current strengths and gaps in the literature will be of interest to researchers and practitioners who do work related to youth, arts, and well-being. Policymakers, community leaders, and youth themselves may also be interested in these findings. Our recommendations offer ways to fill gaps in current research and promote the cross-disciplinary partnerships needed to untangle the complex strands of literature and weave them back together in a meaningful way.

This study was conducted by RAND Education and Labor.

RAND Education and Labor

RAND Education and Labor is a division of RAND that conducts research on early childhood through postsecondary education programs, workforce development, and programs and policies affecting workers, entrepreneurship, and financial literacy and decisionmaking. More information about RAND can be found at www.rand.org. Questions about this report should be directed to Joie Acosta at jacosta@rand.org, and questions about RAND Education and Labor should be directed to educationandlabor@rand.org.

Appendix C. Summary Tables of Literature Describing the Mechanisms Through Which Arts Engagement Promotes Well-Being

This appendix contains a subset of the literature we reviewed for this report that specifically describes the mechanisms through which arts engagement promotes well-being. First, we list the articles describing each mechanism focused on the individual, interpersonal, and community levels (Table C.1). Then, we list the literature describing each mechanism by the well-being dimensions (Table C.2). Finally, we list each reference, the mechanism(s) it describes, the dimension(s) of well-being it describes, and the level of well-being (individual, interpersonal, or community) it describes (Table C.3).

Table C.1. Literature on Each Mechanism Focused on the Individual, Interpersonal, and Community Levels

Mechanism	Individual	Interpersonal	Community
Building agency to make positive social change (*n* = 7 articles)	Abbs, Daniels, and Schillinger, 2022; Bentz and O'Brien, 2019; Botfield et al., 2018; Forenza, 2017; Ibrahim et al., 2022; Kennedy et al., 2020; Walshe, Moula, and Lee, 2022	Forenza, 2017	Forenza, 2017
Facilitating healing and wellness (*n* = 53 articles)	Alemán et al., 2017; Ambler et al., 2021; Archambault et al., 2020; Archibald et al., 2018; Art & Creativity for Healing, 2018; ArtsFund, undated; Atkins et al., 2018; Berberian and Davis, 2020; Boer and Abubakar, 2014; Brooks, Hooker, and Barclay, 2020; Brown et al., 2017; Collins, Darewych, and Chiacchia, 2023; Davies, Knuiman, and Rosenberg, 2016; Easwaran et al., 2021; Edmondson, 2021; Farre et al., 2018; Feen-Calligan et al., 2020; Fenner et al., 2018; Flicker et al., 2014; Fraga, 2017; Gerber et al., 2014; Gordon-Nesbitt and Howarth, 2020; Gorry, 2019; Grasser and Javanbakht, 2021; Gustafson, 2019; Harper et al., 2021; Ito-Jaeger et al., 2022; Janzen et al., 2022; Jensen and Bonde, 2018; Johnson-Pierce, 2022; Keiller et al., 2023; Knifsend and Juvonen, 2023; Kukkonen, 2021; Le Vu et al., 2022; Leung et al., 2014; Lilley, Oberle, and Thompson, 2014; Luo, Ibrahim, and Abidin, 2022; Masuku et al., 2018; Oklan and Henderson, 2014; Palvan et al., 2021; Pepic et al., 2022; Quillen and Dell'Erba, 2020; Rowe et al., 2017; Sharififard et al., 2020; Sidman, 2019; Sitzer and Stockwell, 2015; Vaillancourt et al., 2023; Vandenbroucke and Meeks, 2018;	Easwaran et al., 2021; Quillen and Dell'Erba, 2020; Sidman, 2019	ArtsFund, undated; Boer and Abubakar, 2014; Fenner et al., 2018; Gordon-Nesbitt and Howarth, 2020; Luo, Ibrahim, and Abidin, 2022; Sidman, 2019

Mechanism	Individual	Interpersonal	Community
	Walshe, Lee, and Smith, 2020; Walshe, Moula, and Lee, 2022; Wigham et al., 2020; Wilson, 2021; Zarobe and Bungay, 2017		
Encouraging self-expression (*n* = 34 articles)	Anderson and Mack, 2019; Art & Creativity for Healing, 2018; Borowski, 2023; Botfield et al., 2018; Dingle et al., 2021; Easwaran et al., 2021; Eglinton, Gubrium, and Wexler, 2017; Fenner et al., 2018; Foster and Jenkins, 2017; Fraga, 2017; Gotthardt et al., 2023; Gustafson, 2019; Hanrahan and Banerjee, 2017; Horner, 2017; Kashin, 2022; Kelly, 2017; Kennedy et al., 2020; Kindekens et al., 2014; Kukkonen, 2021; Lea, Malorni, and Jones, 2019; Lee, 2020; Office of Juvenile Justice and Delinquency Prevention, 2016; Pepic et al., 2022; Robey et al., 2018; Rowe et al., 2017; Saarikallio, Randall, and Baltazar, 2020; Sonke et al., 2021a; Travis and Bowman, 2015; Victor et al., 2016; Wigham et al., 2020	Easwaran et al., 2021; Eglinton, Gubrium, and Wexler, 2017; Forenza, 2017; Gotthardt et al., 2023; Hanrahan and Banerjee, 2017; Lea, Malorni, and Jones, 2019; Travis and Bowman, 2015; Victor et al., 2016	Fenner et al., 2018; Forenza, 2017; Goldbard, 2018; Kindekens et al., 2014; Krombach and Witmer, undated
Creating social connections and community (*n* = 47 articles)	ArtsFund, undated; Boer and Abubakar, 2014; Borowski, 2023; Chak and Raponi-Saunders, 2021; Dingle et al., 2021; Easwaran et al., 2021; Eglinton, Gubrium, and Wexler, 2017; Ennis and Tonkin, 2018; Farrington and Shewfelt, 2020; Fenner et al., 2018; Flicker et al., 2014; Gallant, 2022; Gordon-Nesbitt and Howarth, 2020; Gotthardt et al., 2023; Hanrahan and Banerjee, 2017; Horner, 2017; Knifsend and Juvonen, 2023; Kukkonen, 2021; Lea, Malorni, and Jones, 2019; Lee, 2020; Luo, Ibrahim, and Abidin, 2022; McClanahan and Hartmann, 2018; Montgomery, 2017; Ngo, 2017; Quillen and Dell'Erba, 2020; Sampson and Gifford, 2010; Sonke et al., 2021a; Travis and Bowman, 2015; Van Katwyk and Seko, 2019; Vettraino, Linds, and Jindal-Snape, 2017; Victor et al., 2016	Anderson et al., 2017; Armstrong and Ross, 2021; Conrad, 2015; Deng, 2017; Easwaran et al., 2021; Eglinton, Gubrium, and Wexler, 2017; Forenza, 2017; Gallant, 2022; Gotthardt et al., 2023; Hanrahan and Banerjee, 2017; Holochwost, Goldstein, and Wolf, 2021; Kim and Boyns, 2014; Lea, Malorni, and Jones, 2019; Montgomery, 2017; Quillen and Dell'Erba, 2020; Rowe, Salo, and Rubin, 2018; Sunday, 2015; Victor et al., 2016	ArtsFund, undated; Beauregard et al., 2020; Boer and Abubakar, 2014; Engh et al., 2021; Fenner et al., 2018; Forenza, 2017; Goldbard, 2018; Gordon-Nesbitt and Howarth, 2020; Krombach and Witmer, undated; Luo, Ibrahim, and Abidin, 2022; Rose, Daniel, and Liu, 2017; Zarobe and Bungay, 2017; Zitcer, Hawkins, and Vakharia, 2016
Developing skills development and a mastery mindset (*n* = 41 articles)	Antoni, Nutik, and Rasmussen, 2013; ArtsFund, undated; Borowski, 2023; Bowen, Greene, and Kisida, 2014; Bowen and Kisida, 2019; Brown et al., 2018; Dingle et al., 2021; Easwaran et al., 2021; Elpus, 2014; Ennis and Tonkin, 2018; Farrington and Shewfelt, 2020; Foster and Jenkins, 2017; Gara and Winsler, 2020; Gustafson, 2019; Hardimann, 2016; Hoffmann, Ivcevic, and Maliakkal, 2021; Hogan et al., 2018; Horner, 2017; Johnson et al., 2017; Kashin, 2022; Kindekens et al., 2014; Kukkonen, 2021; Lea, Malorni, and Jones, 2019; Lee, 2020; Loebach et al., 2019; McClanahan and Hartmann, 2018; National Endowment for the Arts, 2020; Pantaleo, 2024; Quillen and Dell'Erba, 2020; Robey et al., 2018; Sidman, 2019; Sonke et al., 2021b; Thomas, 2016; Vasileva and Honkatukia, 2023; Victor et al., 2016; Wolf and Holochwost, 2014; Zazulak et al., 2015	Easwaran et al., 2021; Fanian et al., 2015; Kindekens et al., 2014; Lea, Malorni, and Jones, 2019; Quillen and Dell'Erba, 2020; Rowe, Salo, and Rubin, 2018; Sidman, 2019; Travis and Bowman, 2015; Victor et al., 2016; Zazulak et al., 2015	ArtsFund, undated; Johnson et al., 2017; Krombach and Witmer, undated; Sidman, 2019

Table C.2. Literature on Well-Being Dimensions Identified as Being Associated with Key Mechanisms

Mechanism	Academic and Practical Competencies	Productivity and Employability	Cultural and Spiritual Beliefs and Values	Economic Stability	Civic Engagement and Community Safety	Connectedness to Others and Their Environment	Positive State of Mind	Physical Health	Feelings of Inclusion and Justice
Building agency to make positive social change (*n* = 7 articles)	Abbs, Daniels, and Schillinger, 2022; Bentz and O'Brien, 2019	—	Walshe, Moula, and Lee, 2022	—	Bentz and O'Brien, 2019; Walshe, Moula, and Lee, 2022	Abbs, Daniels, and Schillinger, 2022; Forenza, 2017	Botfield et al., 2018; Forenza, 2017; Kennedy et al., 2020; Walshe, Moula, and Lee, 2022	Bentz and O'Brien, 2019; Botfield et al., 2018	Botfield et al., 2018; Ibrahim et al., 2022

Appendix D. Targeted Disciplinary Literature Reviewed

This appendix contains the disciplinary literature that we reviewed as part of our targeted disciplinary literature search. We aimed to find five to ten recent publications on youth arts and well-being in the flagship journals (i.e., the journals officially published by professional associations) of five disciplines: psychology, medicine, education, sociology, and political science. These journals are considered flagship journals because they are the journals published by the national professional associations for each discipline (e.g., the American Psychological Association [APA], the American Medical Association). Our aim was to review these publications to begin to understand the variations in discipline-specific theoretical orientation and methodological approaches to studying the impact of arts engagement on youth well-being. There are many possible disciplines relevant to arts engagement, and the list of five disciplines was identified as a way to begin exploring whether research on arts engagement was present in more–narrowly focused discipline-specific journals. Other disciplines, such as anthropology and public health, could also be examined using a similar approach. Note that this search did not uncover articles that did not use well-being language, but it may have covered topics that were related to well-being more broadly (e.g., child development, resilience). The results of this search are shown in Table D.1.

Our search of *American Psychologist*, the APA's flagship journal, found no articles published since 2000 with *arts* and *wellbeing* in the title and only three articles published since 2020 related to youth well-being. To augment this limited literature representing the psychological perspective, we reviewed six additional articles published in 2024 by the journal of APA Division 10,[1] *Psychology of Aesthetics, Creativity, and the Arts*, on topics specifically related to well-being.

Our search of the *Journal of the American Medical Association* (*JAMA*) also found no articles published since 2000 with *arts* and *wellbeing* in the title. Five articles related to youth well-being and the arts have been published in *JAMA* since 2023, and a summary of one article was published in a companion journal (*The New England Journal of Medicine*) in 2022.

Our search of the *American Educational Research Journal*, the flagship journal of the American Educational Research Association, found no articles published since 2000 with *arts* and *wellbeing* in the title. Four articles published since 2024 were identified that discussed aspects of youth well-being. One article examined how school tardiness and absences affected well-being (Moldero et al., 2024).

---

[1] APA Division 10 is the Society for the Psychology of Aesthetics, Creativity, and the Arts.

Table D.1. Results of Targeted Search of Flagship Journals by Discipline

Discipline	Flagship Journal	Articles Found When Searching for *Art* and *Wellbeing* in the Title	Articles Found When Searching for *Youth* and *Wellbeing* Anywhere in the Text	Other Strategies Used
Psychology	*American Psychologist*	0	3	Searched the APA Division 10 journal, *Psychology of Aesthetics, Creativity, and the Arts* (*n* = 6 articles)
Medicine	*JAMA*	0	5	Included one additional article from *The New England Journal of Medicine* that was summarized in *JAMA*
Education	*American Educational Research Journal*	0	4	None
Sociology	*American Sociological Review*	0	6	None
Political science	*American Political Science Review*	0	2	Searched Google for *social contract* and *art* to find an example

Our search of the *American Sociological Review*, the flagship journal of the American Sociological Association, found no articles published since 2000 with *arts* and *wellbeing* in the title. We were able to identify six articles published since 2021 that related to youth well-being.

The *American Political Science Review*, the flagship journal of the American Political Science Association, had few articles related to our topic. We were able to identify two articles, published in 2000 and 2001, that were related to youth well-being.

Psychology

Psychology is the study of the mind and behavior and how they are related. Psychologists consider how biology, cognition, development, social factors, personality, mental health, and physical health influence how humans think and act. In the context of arts and well-being, psychologists consider how practicing the arts influences humans' cognition, supports healthy development and social connections, and helps promote overall mental and physical health. For example, articles we found in *American Psychology* highlighted opportunities, while youth are undergoing puberty, to reshape neurobiological systems disrupted by stress in early childhood— essentially, to promote resilience (Gee, 2022). One article discussed well-being in the context of resilience and examined how beliefs and relationships promote well-being, especially in the face of adversity (Prime, Wade, and Browne, 2020). Two articles described the role of technology in

promoting creativity (Guan et al., 2024) and increasing access to the arts (Webb et al., 2024). Another article argued that, to manifest creative expression, an individual must have their basic needs met, which allows them to develop the intrinsic motivation (i.e., the internal drive) to be creative (Urban, Pesout, and Urban, 2024).

Most relevant to the arts context was an article that described how the psychological features of specific experiences with the arts and humanities varied by domain (e.g., performing arts, music, visual arts), mode of engagement (e.g., producing, teaching, playing), and context of engagement (e.g., work, leisure, health/therapeutic) (Crone et al., 2024). The researchers found that discrete arts engagements (e.g., a one-session writing workshop) were more social than recurrent activities (e.g., weekly music lessons), whereas recurrent activities were more focused on skill-building.

Crone et al. (2024) also identified eight dimensions that characterize the psychological functioning associated with arts and humanities engagement: (1) growth in self-exploration, expression, and creativity; (2) meaningful, immersive, rewarding, and thought-provoking engagement; (3) pleasure (i.e., finding the activity fun, exciting, etc.); (4) connecting with others, with culture, or with community to promote a sense of belonging; (5) discomfort (i.e., finding the activity difficult, confusing, challenging, etc.); (6) retrospection (i.e., finding the activity calming, nostalgic); (7) providing participants with a sense of achievement at learning new skills; and (8) changing participants' perspectives or worldviews. These dimensions resemble the RAISE model (discussed in Shim et al., 2019; Tay, Pawelski, and Keith, 2018; and Thapa et al., 2023), which identifies five psychological mechanisms that may mediate the association between arts and humanities engagement and well-being: (1) *reflectiveness*, or the cognitive-emotional process that reinforces or discards aspects of habits, character, and worldview; (2) *acquisition* of skills that underlie particular perspectives or habits; (3) *immersion*, or capturing one's attention through meaningful or thought-provoking engagement; (4) *socialization*, or the diversity and accumulation of social roles and identities within communities and cultures; and (5) *embeddedness*, which reflects the socio-cognitive processes that underlie the development of habits or skills.

Across the psychology articles we reviewed, all called for improved interdisciplinary collaborations to move the well-being–focused efforts forward.

Medicine

The field of medicine approaches well-being from the perspective of health promotion and, like psychology, examines how biology, experiences, and care-seeking behaviors—both in one's environment and specific to the medical system—produce health. The relative emphasis on biology, genetics, and the medical system helps distinguish health promotion theory from psychological well-being theory. Examining the role of arts in the medical system (e.g., hospital artwork) and studying physiological reactions to arts engagement (e.g., heart rate and blood pressure reductions) are examples of how the medical discipline uniquely approaches understanding arts engagement and well-being. For example, one of the articles we found in *JAMA* examined the relationship between medical intervention, physical health, and identity

(Chen et al., 2023). Another article proposed, as part of the U.S. Department of the Treasury, a Kids Progress Administration to lead planning and policy development, guide community investments, and support place-based thriving to combat the declining well-being of American youth (Halfon, Russ, and Counts, 2024). A third article examined the relationship between experiences of racism and well-being (Jindal et al., 2022).

Most relevant to this report were two articles on how narrative play and art in hospital rooms may promote well-being. These articles reflected specific case studies from the field. One case study described a virtual interactive narrative-play game to help youth set goals and then think through decisions and alternatives in peer pressure situations (e.g., a friend offers the youth an alcoholic beverage; see Figure 4) (Sinha, Rowe, and Ozer, 2024). The other case study described a "profoundly simple" and impactful way to improve hospital room window treatments: A doctor gave a youth patient washable window markers to create a mural on their hospital room windows, and, as more care providers (e.g., nurses and doctors) entered, they would add drawings or words of encouragement to the mural the patient had started (see Figure 5) (Wu, Harding, and Lombard, 2024, p. 546). These acts helped care providers understand the youth patient better and created more compassionate interactions. The youth patient reported less pain and more joy.

The final medical article we reviewed characterized medicine as "an art" and discussed how compassionate, respectful, and empathetic care can translate into improved patient outcomes and less provider burnout (Strange and Castella, 2024). Notably, most of the articles we reviewed from *JAMA* were opinion pieces rather than empirical research studies.

Education

Educational theory (e.g., learning theory) describes how students receive, process, and retain new knowledge; how individual differences and cognitive, emotional, and environmental influences—including the school environment—affect learning; and how the outcomes of learning influence success across the life course. In the context of arts engagement, education uniquely considers how the process of learning and mastering arts practice may influence learning outcomes (within and outside school) and overall quality of life.

Two of the *American Educational Research Journal* articles we reviewed discussed the importance of mastery mindset: One article described how to create a high school college-going culture that instills the belief that all students can go to college (Carey, 2024), and the other described how to instill the belief that education is a right (Esteves, 2023). The final article described efforts to reposition schools as social service hubs; the researchers found that families were likely to use social service resources at schools in a way that was aligned with their needs (i.e., those with greater needs accessed more resources; see Kearney et al., 2024). These articles were not particularly relevant to the arts (e.g., Moldero et al., 2024).

Bautista, "Factors Affecting Tardiness and Absences: A Basis for Intervention," *American Journal of Educational Research*, Vol. 12, No. 6, June 17, 2024.

Sociology

Sociology focuses on the study of social relationships and systems, and the dominant theories in sociology examine the dynamics between systems and social problems (at the macro level) and between groups of people (at the micro level) (i.e., symbolic interactionist theory; see Carter and Fuller, 2016); how parts of the systems influence the performance of the whole system (i.e., functionalist theory; see Turner and Maryanski, 1979); and how certain parts of the system or groups of people benefit from being in power (i.e., conflict theory; see Simmel, 1904). In the context of arts engagement, sociology places emphasis on understanding what systems and groups promote arts engagement, how arts engagement contributes to the overall well-being of a community, and how to ensure that the arts benefit all members of a community—not just those who are more advantaged.

The articles we found in the *American Sociological Review* examined how youth living in economically disadvantaged neighborhoods spend less time in their neighborhoods and have rates of school absences as a result (Browning et al., 2021), how school culture influences whether students have a mastery mindset (Harvey, 2023), how disability and race shape inequalities in educational access (Rivera and Tilcsik, 2023), the impact that moving to asynchronous work will have on women's creative freedom (Ranganathan and Das, 2023), and how religious involvement can increase volunteering behaviors (Lim and Wiertz, 2024). These articles were not particularly relevant to the arts.

Political Science

Political science focuses on the systematic study of governance and examines power, justice, liberty, community, citizenship (rights and obligations), legitimacy, political stability and change, ideologies, and epistemological issues. One of the foundations of political science is that a social contract exists whereby people abide by certain rules and laws, thereby giving those rules and laws legitimacy. The social contract is the foundational structure that governments use to protect rights and allocate power. Whether and how arts and culture are prioritized as part of this social contract and the role of the arts in promoting political action that upholds this social contract are ways in which political scientists contribute to the discussion of well-being in the context of arts engagement.

The first article we found in the *American Political Science Review* evaluated a book (Mattern, 1998) that explored how popular music was used as an expressive vehicle to spur political action and outlined the challenges in assessing community organizing efforts that leverage creative expression. The book reviewer, William Chaloupka (2000), noted that, to address these challenges, an interdisciplinary approach that brings together sociologists, art historians, anthropologists, literary theorists, students of social movements, and cultural studies scholars is needed, all of whom have something unique to offer to advance the study of creative expression and political action.

The second article discussed the political determinants of subjective well-being, finding that people living in countries with left-leaning governments (often termed *welfare states*) had greater life satisfaction (Radcliff, 2001). Radcliff concluded his study by noting the limitations of his analyses, which simplify a complex set of social, political, and economic interactions. Again, these articles were not particularly relevant to the arts.
